

Aesthetic Services

Neuromodulators (Botox®, Dysport®, Xeomin®) \$15/unit

Used to dramatically reduce the signs of aging by temporarily minimizing the appearance of fine lines and wrinkles. Areas such as the crow's feet (Canthal Lines), between the brows (Glabellar Lines), and the horizontal lines on the forehead are easily addressed with several tiny injections of a neuromodulator. Injectable toxins can also be used to address other concerns such as softening a squared jawline, lifting the eyebrows to open the eye, relaxing the masseter muscles to relieve TMJ, and more.

Chemical Peels \$175 & up

Chemical peels are an important part of skin maintenance. Pigment, sun damage, fine lines, and acne can be addressed with regular peels. Twice yearly peel formulations also available to encourage collagen production and skin turnover.

Microneedling \$350 or 3/\$900

SkinPen® is a state-of-the-art, medical-grade, FDA-approved device used during microneedling sessions to minimize the appearance of fine lines, moderate-to-severe wrinkles, deep folds and scars all over the body. In fact, it is now the gold standard of microneedling.

This incredibly precise device allows for the controlled induction of your skin's own natural healing process. This is promoted through the creation of thousands of precise "micro-injuries" in your dermis. This automatically triggers the synthesis of new, healthy collagen without causing scars to form.

PRP Microneedling \$800 or 3/\$2250

ProGen Advantage Platelet Rich Plasma (PRP), facilitated by the SkinPen®, uses your skin's natural properties and ability to repair damaged tissues. This allows your skin to look its very best. Using a small sample of your blood, the blood is spun, resulting in enriched plasma that can be applied where it is needed with the SkinPen®.

Teen Acne Therapy \$100

Great for teens 19 and under that are fighting congested skin. Our acne facials clear away dirt, buildup, and impurities from your skin, so acne is less likely to appear. After several acne facials, you will likely notice a difference in the number of pimples and reoccurrence of your acne. Dependent on your skin, we use different modalities to break down dead skin cells and help clear pore congestion. High frequency treatment is included to kill bacteria and soothe red irritated skin. You will leave with fresh, bright and smooth skin.

Medical Grade Skincare Prices Vary

Skin Better Science's brand of medical grade skincare products contain higher concentrations of active ingredients than what you can buy over the counter. These products use prescription-strength ingredients to promote your overall skin health while helping you look and feel your best.

ADDITIONAL SERVICES

Medical Weightloss

Designed to support you and help you reach your weightloss goals in a safe, effective and sustainable manner. Our program includes a comprehensive evaluation, personalized plan, and ongoing support.

IV Hydration

Fully customizable formulas that deliver essential fluids, electrolytes, vitamins and minerals directly to the bloodstream for maximum absorption and immediate effects.

Direct Primary Care

A revolutionary care model that allows for longer appointment times, greater access to appointments that fit your schedule and transparent pricing with none of the extra surprises of insurance.

Ask us about any of the services above for more information.
